

Hymed

Clinical Skin Care For Long Term Use

Hymed's Beginning

- Hymed was formulated by a team of doctors and scientists which include: *Dr. Brian Jegasothy*, a world renowned Dermatologist and former head of the department of Dermatology at Pittsburgh University , *Edward Janoski M.S.*, an international researcher and expert in vitamins, minerals and holistic medicine who holds 30 patents worldwide, *Dr. Paul Ellis*, a nationally recognized scientist and expert in free radicals and anti-oxidants who holds 100 patents worldwide, and *Dr. Wilbert Tsau*, a bio-scientist with 20 years of experience in toxicology, synthetic blood and silicone chemistry.

The Hymed Difference

- Science has proven that hydration through Hyaluronic Acid is an essential element in repairing irritated and damaged skin after surgery and laser treatments by helping to stimulate growth factors.
- Hyaluronic acid with its amazing hydrating and healing properties can help heal bed sores, eczema, psoriasis, burn wounds and severely dry skin conditions.
- Wounds are repaired and heal quicker due to the large amount of hyaluronic acid and the pure, non-toxic formulations.

What's In It?

- Most people have no idea of what ingredients they are actually purchasing.
- The majority of skin care products sold today contain ingredients known to be irritants and toxins, and some even linked to cancer!

Some Common Toxic Ingredients In Skin Care

- Hymed is FREE from these known toxic ingredients:
- **Parabens**- (Methyl, Ethyl, Propyl, and Butyl parabens) account for 27% of contact dermatitis and many studies link these agents to cancer.
- **Fragrance**- Synthetic and natural scents account for 30% of contact dermatitis.
- **Dyes**- Continuous use of dyes can cause irritation and free radical damage.

Some Common Toxic Ingredients In Skin Care

- **Propylene Glycol**- Used as a humectant, solvent and fungicide, it accounts for 5% contact dermatitis.
- **Lanolin**- Derived from sheep fat. Used as a moisturizer. Can disrupt endocrine functions because of the carcinogens like Dioxin and DDT found in grass the sheep ingest.
- **Human or Animal Derived Ingredients**- Collagen, elastin, growth factors, and other agents can be sourced from animals. High percentages of preservatives are needed to give shelf life, and fragrance is added to mask the odors.

Purpose

Hymed was founded by a team of dermatologists and doctors to bring effective scientific ingredients together with a holistic approach to achieve results quicker and safer.

Hymed Focus

Hymed is the only product line that is clinical and natural!

- Scientific, synergistic blends of Pharmaceutical grade ingredients are used to reduce inflammation even at the cellular level.
- Complex formulations that show results quickly, yet are extremely safe for even the most sensitive skin.

Hymed Ingredients

- **Hyaluronic Acid-** Most powerful humectant known to science. This wonderful molecule is non occlusive, and promotes healing and hydration to all skin types. We use a plant derived version in high concentration in all of our products.
- **Powerful Anti-Oxidants-** Pycnogenol, Green Tea, Vitamin C, Chrysanthemum, Vitamin A, Vitamin E, Calendula, Turmeric, Mangosteen, Noni and Pomegranate to name a few To help reduce inflammation and irritation after surgery as well as to prevent premature aging and free radical damage.
- **Papain and Bromelain Enzymes-** Digest dead skin cell debris, and help maintain a healthy skin cell

Hymed Ingredients

- **Organic Aloe Vera-** extremely healing and hydrating to the skin. Aids in soothing burned skin.
- **Pumpkin Seed Extract-** Helps reduce redness in the skin by working with the mast cells to stop conversion of histadine to histamine which aids in reduction of the inflammatory process.
- **Multi Fruit Acids-**exfoliates to reveal smoother tone and texture, also helps to balance excess oil in the skin.

Free Radicals

- Many studies show how Free Radicals create inflammation at the subclinical level.
- Free Radicals are very active and will create a chain reaction of destruction.
- This continuous process of exposure to the Free Radicals in our environment leads to pre mature aging and potentially to mutations in the DNA of cells that can lead to cancers.

Hymed Products

Cleansers

- **Gentle Skin Cleanser**- All skin types from head to toe. Great for extremely sensitive or compromised skin conditions. Also, an excellent shave gel, shampoo, or bubble bath.
- **Facial Cleanser**-Excellent cleanser for Normal to Oily or acne skin.
- **Salicylic Facial Cleanser**-Great for Acne and Oily skin conditions on face or body. Leaves skin toned.
- **Gentle Cleanser for Cancer Centers**-Hydrating, anti bacterial cleanser for all skins, specially formulated for compromised skin, pre or post operative, chemotherapy, and radiation.

Hymed Products

Toners

- **Colloidal Silver with Lavender Floral Water-** amazing toner for all skin types, broad spectrum anti-bacterial, anti-fungal, and anti-viral agent, that is safe for use. Can be used on acne to reduce bacterial activity, on burns to aid in minimizing redness and irritation, as an effective hand sanitizer, and for so many other purposes! A truly wonderful, unique product!

Hymed Products

- **Exfoliants**
- **Glycolic Home Treatment-** For all skin types, exfoliates the skin to minimize fine lines and wrinkles, evens the tone and texture and also helps balance excess oils and dull skin with multi fruit acids.
- **Glycolic Body Treatment-** An excellent product to help exfoliate and smooth dry and or flaky skin, also helps to reduce acne breakouts on the body and prevents ingrown hairs.

Hymed Products

Rejuvenation Treatments

- **Beyond Complex C**-A bioactive serum that reduces wrinkles up to 25% in 12 days! Great for reducing photo damage, rosacea, and fine lines. Improves overall tone and texture of skin.
- **Skin Lightening Treatment**- Helps to fade hyper pigmentation in the skin from melasma, chloasma, freckles, age spots and overall darkness.
